NOTE: In most instances where a grain company operates two or more primary elevators at one location, the operations have been combined under a single manager. This has been aided by the trading of elevators between companies. As a result of a move towards greater economy and efficiency, the 1,754 elevators individually licensed as at February 1, 1988 reflect 1,685 'operating units'. The above table indicates this pattern, according to the major companies. The bracketed figures indicate the licensed elevators. It should be recognized that this statement reflects a constantly changing situation and is based upon the latest available data.

NOTA: Dans la plupart des cas, lorsqu'une compagnie céréalière exploite deux silos primaires ou plus au même endroit, les exploitations ont été combinées et relèvent d'un seul directeur. L'échange de silos entre compagnies a favorisé cette politique. En vue d'accroitre les avantages économiques et l'efficacité des opérations, les 1,754 silos agréés au 1er février 1988 représentent seulement 1,685 'unités d'exploitation'. Le tableau ci-dessus indique cette tendance pour les compagnies principales. Les chiffres entre parenthèses indiquent les silos agréés. Il faut se rappeler qu'il s'agit d'une situation qui évolue sans cesse et qui est fondée sur les plus récentes données disponibles.
